

BabyVelvet: A Reimplementation of Velvet in the Codon Programming Language

Process

Results

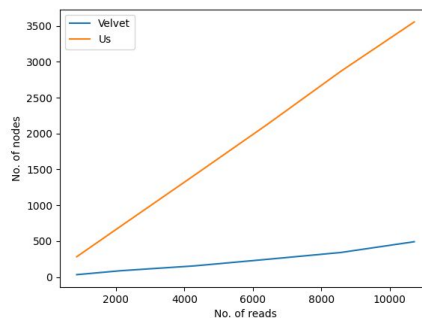

Figure 1. Number of nodes in the final graph for different numbers of reads in the input data.

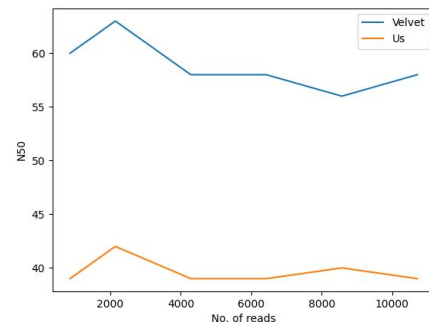

Figure 2. N50 metric for the final contigs found in the final graphs for different numbers of reads in the input data.

Table 1. Comparison between Velvet's final graph and our implementation's final graph on simulated reads from a 50-Kb region in the *E. Coli* genome.

Algorithm	No. of Nodes	N50	Max. Length
Velvet	155	58	125
Baby Velvet	1416	39	128
